***EXAMINER'S COMMENTS***

***Withdrawn-Specification Objection***

1. Previous objections to the specification are withdrawn by virtue of submission of an amendment.

***Withdrawn-Sequence Compliance Objection***

2. Previous sequence compliance objections are withdrawn by virtue of submission of a paper copy, computer readable form and statement.

***Withdrawn-Claim Rejections - 35 USC § 112***

3. Previous rejection to the claims under 35 U.S.C. 112, first paragraphs written description and enablement are withdrawn by virtue of the amendments submitted to the claims.

***Withdrawn-Claim Rejections - 35 USC § 102***

4. Previous rejection to the claims under 35 U.S.C. 102, is withdrawn by virtue of the amendments submitted to the claims.

***REASONS FOR ALLOWANCE***

5. The following is an Examiner's statement of reasons for allowance:

The claimed invention is directed to an isolated nucleic acid molecule comprising the

Art Unit: 1656

sequence of SEQ ID NO:2, a vector and host cell. A search of commercial databases produced a reference that teaches the claimed structure with a 99.9% sequence identity because the sequence has three conservative substitutions (see WO 98/50555, of record). No evidence exists of a sequencing error or differences due to a strain differential. Thus the claimed structure and the cited prior art of record are viewed as different DNAs, although they are derived from the same gene. Therefore, the claimed invention is novel and nonobvious over the prior art.

6. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance".

### ***Conclusion***

7. Claims 2-3 are allowable.
